If you attempt to use this driver on a newer version of Premiere, it may not work. Â Â However, if you need to use this driver on an older Premiere product, here is what I did: Instead of uninstalling and reinstalling as one usually does, I copied the executable files for the old driver (CcAmtlib.dll, Amtlib, Amtlib.exe, AmtlibAdapter), the old registry settings (IfHWID, IfACI, IfAMT), the old system folder (DLLs,.bat files, icon, etc.). I then put all those files together into a folder on my desktop, and changed the path to the application in the Registry settings to the new desktop. That is the only thing that I had to do. I then opened Premiere, and was able to load and run as usual. There is no need for an uninstall anymore.
