ObjectARX is a C++ class library for C++ developers and C++ programmers to create AutoCAD-based add-ons. ObjectARX is a cross-platform library for creating drawing automation and drawing applications. History AutoCAD was created in 1984 by a team of 16 people led by Frank Natzke and Tom Jeddelloh, who had previously co-authored AutoCAD for Basic Users and AutoCAD for Msw Users. The first version was known as AutoCAD 84. For version 2 (named AutoCAD 85) the team expanded to 25 developers, and for version 3 (AutoCAD 1986) to 26. Natzke, who was named Vice President of Engineering, took over as President of AutoCAD Corporation in 1989. The company then became a public company in 1990 and was renamed Autodesk. ObjectARX (originally named ARX) was the foundation for the AutoLISP, AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D, AutoCAD Geospatial and AutoCAD Architectural development teams. The addition of the AutoCAD Architecture and AutoCAD Electrical products to the product line was announced on April 5, 1992. The release of AutoCAD Architecture was the first instance of a third-party AutoCAD plug-in that was not compatible with AutoCAD itself. The plug-in was successful and Autodesk decided to fund several other third-party

AutoCAD-based applications. For version 7 (AutoCAD 88), the development team adopted a dual philosophy, with some products coming out under the Autodesk brand (AutoCAD, TLA, Viewer, MEP, etc.) and some products being developed in partnership with other software developers such as CAD-Monster, their own a1d647c40b
