You just have to choose the drive on which the corrupted workbook is located and click the 'Start Recovery' button. • The tool has a convenient user interface, it can scan all corrupt Excel files and recover the content of them. In addition, the utility is able to choose the file types of the workbooks to be recovered, so you can select one of them. You can even select several ones, then this program will combine all selected workbooks to one. • MS Excel Recovery Toolbox is a safe solution for MS Excel repair. All changes made in the saved files will be lost after a process of data recovery and all files will be saved as they were before the damage. After the repair process, there is no need to repair your data again. The restored data will be exactly the same as the original, it will have no alterations. • The program is easy to use and requires a very little of your time, as you can recover the content of one workbook at once. • MS Excel Recovery Toolbox can search and analyze the data of all files located on the computer. It works for every version of MS Excel, from 2003 to 2019. • The application has the ability to add a lot of columns and rows to the

---

files, so you can recover the data of corrupted xls files quickly and easily. • The system requirements of the application are very low, as it has no need of high RAM. • The system requirements of the application are low, as it has no need of high RAM. The full-fledged and handy xls to csv software from VCE-eSoft The application uses the advanced function of converting XLS file to CSV file. Specially designed

### **Excel Recovery Toolbox Free [32|64bit]**

Excel Recovery Toolbox supports a wide range of functions and macros of Excel, for more details please refer to the description during the installation of the program. MS Excel file recovery: Excel Recovery Toolbox is a handy tool that allows you to recover Microsoft Excel files that are damaged or corrupted, you may open a file from any folder or on the network or USB drive. So far Excel Recovery Toolbox is able to process three different types of errors in xls files: - OLE errors - Macros execution - Filenotfound When a Microsoft Excel file is damaged or corrupting, often applications like Excel Repair Tool allow getting back its contents, but there are instances when it is not possible and MS Excel recovery becomes indispensable, for example if macro is corrupted. The program is known to have a better effectiveness than repair software and is a great help if you want to recover Excel files in the case of OLE errors. Moreover, the program has an additional ability to process macros in the damaged file. It is one of the most popular repair tools, MS Excel Recovery Toolbox was programmed by a team of professional programmers with an intention to improve the capabilities of the software, and the program has a really good user interface. The procedure of data recovery in Excel Recovery Toolbox is very simple and convenient to perform, when the file has been already selected in the system dialog, it is enough to press the open button, wait a couple of seconds and the analysis will be started. In the same time, you may choose whether to save the recovered file in a different folder or leave it as it is. Excel Recovery Toolbox provides you with a very accurate scan of Excel files, it is capable of detecting all types of errors that may affect Excel files, this is especially useful if the file is damaged. To conclude, all the tools that are currently offered by Excel Recovery Toolbox enable you to restore all types of damaged and corrupted files, they are all in one place, so you can focus on the data recovery.
