Banshee is a music player and library organizer for GNOME and KDE. //--------------------------------------- // Licensed under LGPLv2.1 or later - In the past, I have demonstrated how to use Banshee to rip and organize MP3 files, but I didn't show you a way to manage your music with it. Here is one of the ways I use it: Play an Audio CD Add the audio CD to Banshee and start playing it Use the button in the lower left corner to navigate to the next song, the previous song, the playlists, etc. Add the files from the CD to the main library Sort by album, artist, or genre Preview the music and read the track names with the text tool This is a really great feature and this goes beyond any MP3 Player on the market. And of course, there are lots of other features, like playlists, searching, podcasts, support for many file formats and lots more. Banshee 1.8.1 or later is recommended for this tutorial. To play or add an audio CD to Banshee, you will need to do the following: Open Banshee from your applications menu. Navigate to the CD drive where you want to play the music. (For example, in the CD drive it is probably /dev/cdrom0). Open the music CD in Banshee. After playing the CD, Banshee stores all of the files in the music CD in the main library. You can then browse these files as described above. Add Audio CD and browse music files As stated above, you must add the audio CD to Banshee before you can browse the music from it. After adding the audio CD to Banshee, it will be added to the library.

The easiest way to add a music CD to Banshee is to do the following: Open Banshee from your applications menu. Click on Music and then click on Add CD. Navigate to the CD drive where you
