## Alsource3i Openal32.dll Dirt 3 22 !!EXCLUSIVE!!

Drivers and Software. Jul 24, 2010 First I tried uninstalling it, restarting my computer, and reinstalling it, followed by the error. I thought it might have been because of the game (I've tried both Windows 7 and 8) so I tried downloading it on two different Windows 8 computers, and that produced the same error. I recently updated my graphics card to a Radeon HD 6970, and I think the error is due to this. Even after I re-installed drivers and reinstalled the game, the error persisted. So I figured I'd ask if anyone knows what's going on, and if you had problems like this before. A: I solved my own problem. It had nothing to do with the drivers, it was a conflict between my computer and the game. My computer did have drivers installed for the Radeon HD 6970, but the game itself was a bit buggy. It would free-fall through the landscape after being in normal driving mode for a while. I deleted the game, restarted my computer, and re-installed it. I downloaded the game again, and it installed correctly. I still don't know if the error was actually caused by the drivers or the game itself, but the game worked this time, and it wasn't bugging me.
