
Payday 2 Render Settings

December 26, 2019 - I was trying to follow the super low payday 2 config file. it's "renderer_settings.xml" not "render_settings.xml". I'm going into a file I created in the config folder that links to a file I created in the config folder using render_settings.xml. This was all done with the Windows Resource Manager, which worked fine in the test environment, even after running the lz4 command on the command line. I installed Windows 10 Pro x64. The problem is that when I run the command prompt, I see some errors. In the meantime, I can check the status of this issue online.
