When I would like to go to that folder, double-clicking it or clicking on its icon in the Windows Explorer shows a blue or a gray/black/white screen. When I select OK from the Windows Explorer window, the blue screen reappears. Then I can drag and drop files. But I can't open any folders. There is no password on the root directory. I tried to start a command prompt and tried to run `cd winxp`. Finally I couldn't start the command prompt and the blue screen appeared. Here is the output of the start command:
