Is this the right way to do or I am missing some other

approaches for the same. Please help me here def getList = future{Future { val l = List(1,2,3,4) } } def testGetList() = { val result: Future[List[String]] = getList assert(result == l) assert(result.isCompleted) } A: First, you should name your method getList which is usually better practise. So in your case it should be: def getList: Future[List[String]] = Future { val l = List(1,2,3,4) l } Then use the same sequence of steps you should use when testing code that returns an already completed Future. In this case you will need to use Await.result() which gives

you a successful result and you will also need to make sure that you test against l rather than using the incomplete result that you are creating by not wrapping the body of your future in another method. def testGetList = { val l = List(1,2,3,4) def getList: Future[List[String]] = Future { val l = List(1,2,3,4) l } test("should return List[String]") { val result: Future[List[String]] = getList Await.result(result, Duration.Inf) should be (l) } } Testing with a result that isn't exactly what you expect

The blockchain technology has disrupted the world of traditional in a very big way.

YouTube - The finest online video streaming platform online.Apple Inc. Apple Inc. Top U.S. Court of Appeals in Brief To hear what the appeals court hears and for some background on how the case got to it, watch: U.S. Court of Appeals for the Federal Circuit Apple Inc. v. HTC America, Inc. Case No. 12-1171 Appeals in Brief Apple, Inc. claims that HTC America, Inc. infringes its patented technology in two ways. First, the crux of Apple's claims is that HTC did not pay a fee to the government for the "patent Box" technology for an entire phone that Apple cannot use in its own products.

Second, the patent covers the use of "split screen" technology to "break apart" applications and content in a way that Apple believes is a use beyond a function that HTC acknowledged and Apple acknowledges. Apple is seeking $2.6 billion in damages. More: Read Apple Inc. v. HTC America, Inc. First Impressions I'm going to save my opinion for the conclusion but I will say that the briefs are sort of disheartening. Part of me wonders if Apple's lawyers are being overzealous and part of me wonders if this case is really going to get so far. Conclusion A patent case is a

different animal for me. To me it seems much more of a law case and far less of a technology case. I will continue to watch and report. I have no idea how this case will play out but I will continue to tune in and report it. Call it Project Gadfly. More: Read Apple Inc. v. HTC America, Inc.Q: Rails 4.2 Controller Error Trying to figure out why in my Ruby on Rails application I am getting the below error when I try to use the @post from the create method from my Posts controller: ActionController::RoutingError (No route matches [POST] "/posts/1") I have added the rest_api_member_token

and api_v1_membership tables in my Rails application. My user model uses devise. I tried changing my routes.rb to the following which is where I received the error message: resources :users do
