The fantasy action RPG that began with Black Stones, The Elder Scrolls Online: Tamriel Unlimited (TSO:U), is returning with the addition of a brand-new fantasy action RPG, titled Elden Ring. The game will combine the vast world of The Elder Scrolls Online: Tamriel Unlimited with the world of The Elder Scrolls—where players have been able to leave the confines of Cyrodiil since the original game's launch—to deliver a fantasy action RPG that will feel like no other. Players will once again wield the Artorias Plateau, a mystical weapon of power within the world of The Elder Scrolls. The player can choose to become a fighter of the faith, a mystic priest and companion to the Goddess, or a fierce warrior that uses the power of the Elden Ring, a device that can be used to become an Elden Lord. Players will be able to create their own character, which will be able to choose from a variety of potential classes and races. Players will once again be able to enjoy the game's many features, such as exploring a vast world, fighting monsters, and investigating dungeons, through the use of a robust farming system. The game will also include a vast array of other features, including vast PvP and PvE content. The game also has a novel game concept, allowing players to loot items through "field clear" missions, or using them in dungeon quests to help themselves and others. And because the game is being developed by two separate teams and for both platforms (PC and consoles), it offers a very rich and diverse user interface. The Elder Scrolls Online: Tamriel Unlimited (TSO:U) and The Elder Scrolls Online: Elden Ring (TSO:E) will be available in Japan in December 2015 for PC. _____ _____ The next Elder Scrolls Online: Tamriel Unlimited (TSO:U) online presentation is scheduled for December 13 at 12:00 (PT) / 11:00 (UTC). It will be held on Facebook, Twitch, and so on. Follow our Official Twitter and YouTube channel for latest information. About The Elder Scrolls Online: Tamriel Unlimited (TSO:U) The Elder

Basic public health services-those that should be available to all-are often the first to be cut in a public health system that is experiencing budget pressures. A 1-day, interactive seminar was held at the Institute of Medicine to help states and territories focus on their essential or specialized public health services while planning for future reductions in federal or state funds for public health. Presenters addressed two fundamental questions about essential or specialized public health services: what is the purpose of these services and who should receive them.Q: PHPStorm, use brace

combo to set default value I'm using PHPDesktop for SSH access to server and within that I have an idea to set a default value for an input with PHP. Currently the default value is set via a $_POST but I'd like to use a $_GET within the application logic. This can't be done with JavaScript as that needs to change the behaviour of an input so I've tried using the PHP Brace Completions. This would be perfect for this except that the logic can be hundreds of lines of php, so, if the default is set, it can't. I would need to set a default with the PHP value so it can't guess the value. So, no luck. So I come to you. What am I missing? UPDATE: April Fool's Day! Thanks for playing. We made a few bugsheep in preparation for this announcement. Let's do this! Join the battle!Q: return/call final result after a set amount of time regardless of switch case I'm creating a sort of X & Y coordinate converter which returns both X and Y coordinates, but only after a certain amount of time. The issue I'm having is that if I have the following: case 3: break; String randomizer = "also PPPPP3"; String[] randomizerList = randomizer.split(","); System.out.println(randomizerList); The case may be changed to anything else, but I only want to run that particular line of code if case 3 is on. I know I'll have to use if/else statement, but the results I need are so specific that I don't know of an acceptable method for switching it.
