

In Final Fantasy XV, it's said that with three Talismans, an Elden Rune can be obtained from an item called Elden's Burden that can also be acquired from a certain bounty. In Legend of Valkyrie, a Talisman can be obtained from a similar item. In our game, similarly to Final Fantasy XV and Legend of Valkyrie, you can obtain an Elden Rune using the Legacy Rune, which is dropped by monsters as a quest reward. In our game, while runes and runes obtained by characters can be used to obtain Elden Runes, it is not possible to obtain them using the legacy rune. An Elden Rune grants a status buff called "Elden" to the corresponding attribute, making the attributes of the corresponding character stronger. There are not only stat buffs that are applied to attributes, but also buffs for stats that can be added to the stat-bar of the corresponding character. For the attribute associated with the Elden Rune, the strength and the stamina of the corresponding character increase and the enemy's counterattack power is reduced. Character's secondary attribute stat increases as long as they own an Elden Rune. There is also a character buff that appears when you are attacked by an enemy. The criteria of the character buff are not immediately known, so it is possible for enemies to attack you as long as they perform a certain action. An Elden Rune can also be used to unlock additional items. Elites in our game can also obtain secondary attributes. After unlocking an attribute through battles, you can also change its attribute using the Change Attribute function.
