Enix TwitterThe present invention relates to the field of antibacterial agents. In particular, the invention is directed to compounds and compositions that inhibit Bcl-2-like proteins. Compounds useful in inhibiting Bcl-2-like proteins are useful in the field of antibacterial and antifungal agents.

The Bcl-2-like family of proteins is made up of three proteins in human that play critical and ubiquitous roles in regulating the balance between apoptosis and cell survival. There are two major sub-families of Bcl-2-like proteins, i.e., the Bcl-2 subfamily and the Bax-like subfamily. The Bcl-2

proteins are normally found in the mitochondrial membrane where they help to regulate the release of apoptogenic factors, and control the permeability of the outer mitochondrial membrane. The Bcl-2-like proteins are normally held in the cytoplasm by homotypic protein interactions. A proapoptotic Bcl-2 homolog, Bad is inactivated when phosphorylated on a single serine residue, S112, by growth factor-stimulated kinases, such as Akt. The S112Bad phosphorylation is a signal for activation of Bcl-2 and Bcl-Xl family antiapoptotic proteins, by specifically displacing the proteins from their binding partners. In most cells, Akt-dependent phosphorylation of Bad at S112 prevents apoptosis. However, tumor cells have been found to have

## **What is Analyn?**

Analyn is a Troll-like deity in the Lands Between. She created the Graces and protected them from demons for over a thousand years. Some people say that she hates the Elden Ring as this is the new meaning of the "Graces", the people who destroyed her. One day, when Analyn was visiting Ellmrig, her favorite city, she suddenly died. While returning to her castle in the Mountains between the Graces, the journey spirit let out a chilling scream as if terrified at the time of her passing. The same night, demon attacks shook the Empire Graces in the south of the Lands Between.
