I'm waiting on the delivery of my new iMac 27" with the i7, i already got the 09/2010 model with the 320 GB HD. I bought my iPhone 4s, Blackberry Curve & hoping for an 8G iPod Touch in the near future. I'm kind of a tech/entertainment junkie who is trying to stay away from the Apple hype. Macs to me are where I have been as a PC user up until the last few years. I personally don't see the need for an "enterprise" system or Mac Pro. My clientele is generally iPhone/iPad/iPod Touch type people who generally don't have a need for the hardware. After using an 8G iPod Touch, I think Apple needs to make a 2nd gen Touch, so that there's a solid and reliable choice for iPod Touch owners. I am actually more of a "Windows OS" user, but one of my clients was able to get a 1 terabyte external HDD for me as an upgrade to the NEW iMac, so I may have to be on Mac OS X when I go back to a computer. The Clients want me on office productivity software so I will probably be running Eudora, Word or PowerPoint. My other client uses his iPad more for entertainment, so I think he will be the one running iOS. My expectations of Mac OS is that it would have all the cool tech and apps I have already purchased, thus not being forced to buy a new computer to upgrade the OS.
