I need to convert some binary data from an image to a string in Python 3. The binary data look as follows:
00000000720000000102000000020000000 If I do this: print(int.from_bytes(binary.decode('latin1'), byteorder='little', signed=True)) I get the following error: TypeError: unsupported operand type(s) for +: 'bytes' and 'int' How can I convert this in Python? A: print(binary.decode('latin1') + ','.join(map(str, range(32)))) or print print(binascii.unhexlify(binary.decode('latin1'))) A: You get that error because bytes is not equal to int. Use decimal instead. Solution >>>
int.from_bytes(binary.decode('latin1'), byteorder='little',
