Crystal Caves HD is a twin-stick side scrolling platformer for PC that features smartly composed levels, a level editor (for both PC and MAC), a variety of game modes, and a classic adventure theme. "Fun as hell" The stylised graphics are as simple as the game play is simple. It's all about the gameplay and the clever design. The creators of Crystal Caves HD had the gameplay of the original home-grown so they re-used some of the core mechanics, but on top of that they included some new mechanics so the game is similar to the platform adventures by Capcom, but plays much faster and the controls are more responsive. Don't get me wrong, I don't think that the developers tried to reinvent the wheel, but if they tried it's almost impossible to notice that, because the clever design and the game itself make it impossible. So yeah, is it really a remake? Yeah, sure, it may sound simplistic, but the developers were able to expand the old Crystal Caves into a game that's much bigger than the original, with a better story, better enemies, a much better game-mode, and a very nice music. "A wonderful ride" The game isn't easy, the difficulty is almost a trademark feature of this game, but it's up to the individual player to decide when he wants to stop playing, because once you start, you won't be able to stop until you're done. It's easy to earn more stars and the game gives the player rewards for playing the game and completing challenges, which can be spent in the in-game store. The game is for everyone, from the hardcore gamer to the player who likes to challenge himself by completing all the challenges in order to unlock hidden weapons, costumes and items. Please note that you have to meet the system requirements or else the game will automatically crash. "Crystal Caves HD is really great game that takes a classic platform game, with a platform-RPG theme and applies it with a great intuitive gameplay, 2D graphics, great music, and smart design that will keep the gamers challenging." "This game isn't very easy, which is a good thing, but don't let that fool you, you'll have a blast playing this game. This mod allows you to have your units trained to the maximum level on any of the barracks at lvl 3. I'm using this mod with the Longstrikes mod and High Infantry. I've created some mods in the past. Hope you give them a try! -- Of all the human factions within the Warhammer world, the Skavens are probably the most imaginative and unpredictable. They value qualities such as cunning, cunning, cunning and cunning. The Skavens have great charisma, hit points and most importantly, they have a powerful magic system that allows them to shape the world around them as they see fit. They often travel in large nomadic hordes across the world, enslaving humans and other races wherever they go and using the chaos of the Warp to fuel their arcane sorcery. Using chaos to power your magics and squishy units? The Skaven Chieftain is your master. The SKAVEN CHIEPTAN As the leader of a Skaven force, the Skaven Chieftain takes the role of a larger Warlord unit. He is a brilliant tactician and commander and is able to form effective strategies based on the position of the units on the battlefield. When he fights, he joins the battle in the most influential role - as a frontline combatant. The Skaven Chieftain is an awesome close-combat unit and delivers devastating attacks that leave no survivors. What's new:

– Demo Raiding the Party The Corpse Party franchise is still one of the most entertaining and unnerving around. A remake for the PSP is set for coming in July, released by XSeed Games along with that gorgeous screenshot you see above, and a demo is exclusively available now on PlayStation Store. If you're looking for a bit of horror and some ghostly grisly animations, the demo demo is for you. While all of the actual playtesting of the demo is being handled by Kise's brother Chiyashi Kisaragi, I played it for a bit during a recent visit to Tokyo, some of which were the best of my day, and some of which were a little worse. Anyway, enjoy the first look and it can be yours as of today in PlayStation Store, so if it looks like something you'd want to try out, sign up for the email list (here) and I'll let you know as soon as it ships… sometime this month. I first need to say that the demo may be too short, but then this is probably not the most straight forward game to get into. I wish I could say that I flew through it in under an hour, but it took about 3-4, and I naturally slowed down and took my time. So my first impressions, the main problem with the demo is that it's just too short – the longer you spend with characters and trying to work things out, the more it will probably weigh you down. Everytime I went back to investigate something, I felt drawn even deeper into the settings, and the place was looking like it was pretty big. We only get just over an hour to see if you really want to play through the whole game, but it could easily be nearly double that, which may be an issue for some. As you can see from the screen capture, most of the time is taken up by courtyards, but one is a well-stocked living room (I never found out if these two houses are related) and most of the story takes place in the bell tower of the school. In fact, it's comparatively heavy on the security footage and lots of pointing and gliding around because it cuts to much story stuff, so isn't a sample of the game. That being said, it obviously goes into the far more terrifying areas in the bell tower and the school itself, like the gymnasium,

Lightheaded and sweaty, I'm on the three hour train ride back to Beijing. I see the university looming in the window at the back of the train as I gaze out at the countryside flowing by, my gladness mixing with the irritations of being trapped in a busy place.

In an attempt to calm myself down, I smile in response to a surprised shout as something grabs my arm, and I turn to see a soft-breathing kid attached to a belt holding up a fluffy rabbit. At first my heart swells, then I remember I used the ticket. I attempt to pull myself out of this puddle of longing, but not before the kid's mother appears next to him, shooting me a fierce glance of rebuke, and he immediately falls silent.

The child's severity is curiously infectious, and soon half the seats in the carriage are occupied by faces returning my glance from their laptops and books. For a while I wonder what effect my sudden remorse for the vulgarity of my
