Step #3. Edit Your Background

Q: Querying against a nested entity I'm sure this is a very simple, stupid question, but I can't find an answer. I have two entities in a one-to-many relationship. In SQL, I can just do the following query and I get the result I want: `SELECT a.aID, a.bID, a.name, a.otherID, b.name FROM table1 a, table2 b WHERE a.aID = b.aID AND a.otherID = ?` How can I do this in .NET Entity Framework? (I'm using code-first) A: From your description I'm guessing that a.OtherID is a foreign key in the table1. So something like this might work: `From a in Table1s Join b in Table2s on a.OtherID equals b.ID Where a.otherID = ? Select new { a.aID, a.bID, a.name, a.OtherID, b.name }` Q: $\forall x \in [0, 1], \text{ there exists a } y \in [0, 1] \text{ such that } x - y \leq \sqrt{x}$ Let $A =$

$\{x \in [0,1] : x - \sqrt{x} \in [0,1]\}$. I want to show that A has only two elements, namely 0 and 1 , and prove that this can be done with the least amount of calculations. My attempt: First I'll prove that A is closed, but I don't know how. Another thing, is that I don't know how I can prove that A has only two elements, maybe with the order type lemma. A: Since you are on $(0, 1)$, you can easily check that $\sqrt{x} = x - \left(x - \sqrt{x}\right)$. Now, add any other x to the right side and you will get 0 or 1 .

Text Brushes allow you to create text using Photoshop, as opposed to manually typing it into an image. Depending on the size and font you use, it can be a very powerful tool. You can also use the pencil tool to create objects in your image such as lines, circles, and other shapes. The Brush tool allows you to paint and apply textures to your images. You can use the Brush tool to fill in text, rectangles, and circles. You can use the Pen tool to draw elements on canvas. You can use the Pen tool to draw freeform objects, such as hearts or flowers. The Eraser tool allows you to remove objects, but does not allow you to create new objects. The Magic Wand tool allows you to select an object by determining if it is either black or white, as opposed to black or white. The tool

works for any image, and even for images with objects of similar colors. The Lasso tool enables you to select an object or an area of an image by simply clicking and dragging the tool. JetBlue Launches Commercial Flights from New York to Ontario, Canada

Recently, JetBlue Airways, one of the most innovative airlines in the United States, announced the launch of commercial flights to Canada. Specifically, the commercial flight flew for the first time last Thursday, October 19, 2011, between New York and Toronto, a flight that will run on a weekly basis. JetBlue offers a discount for people who choose to book their flights in the weekend. This company proves again how they are different and do better than the competition. In addition, they offer flights from New York to Halifax for the weekend and the same discount prices. But we have to

wait until the end of the year, when this company will offer more routes in the US and Canada. Last year, this company began to offer discounted tickets between New York, Boston and Montreal, which was the first American flight to offer this discount in the United States. Additionally, JetBlue is working on moving to the new long-haul Boeing 787-9 Dreamliner, which is scheduled to start flying in 2013. As we wait for the new long-haul Boeing 787-9 Dreamliner to start flying in 2013, we will continue to see the expansion of JetBlue to New York and the other points where they already offer flights and get more flights to Canada
