Venous thromboembolism is one of the leading causes of morbidity and mortality in surgical patients and is associated with significant disability and increased costs. The aim of this double-blind, placebo-controlled trial was to examine the efficacy and safety of sulodexide (an antithrombotic agent with specific actions on platelets and endothelial cells, registered in Poland) in the prophylaxis of venous thromboembolism in high-risk surgical patients. We enrolled in this trial 305 patients scheduled for elective orthopedic and
