You can collect the items that you missed out on through grinding or you can sell in the game shop on the right hand side of the game screen. Even if your character has all the gear other than equippable armour you can still level the equippable gear with the quest if you never really wanted it You should be able to make use of the valuable equippable armour and make use of the valuable equipment you get for grinding up the items you missed out on the first time round. Just like the FFXII armour grid, Fairy Fencer F has charts to determine which slot would be required and this chart can be seen by clicking on the y-axis. The exact information comes in the table below. If you have the requirement at which is demonstrated at the bottom of the table then you need to follow the appropriate section of the guide for the skill and then slot to that slot number and equip the correct armour at the correct level of that required armour. If we look at my main character, Divine Knight Rubias, on the chart above we can see a slot requirement of 6 where we do require a ring of 4+ on this character. You can see the required ring and the armour attached to that

Opération mesure de situation (OMS) is a French 3D Public Transportation Simulator, developed by @rmfb, released in 2017. OMS ("Situation mesure et opinion") is a transport simulation, based on real issues encountered by the French public transport system. It allows you to take control of the bus that takes you to your destination, listen to the driver's voice, make informed decisions, and improve public transport in general. OMS allows you to help all the people on the roads, taxis, and on the trains, which is what the French public transports wants you to do. ? There are three major missions in OMS: ? Urban: get back to work. Help citizens get back to work during city strikes by contributing to the improvement of public transport for the city. ? Regional: get back to nature. Help citizens get back to nature by improving the public transport to the region and increasing the quality of these travels. ? Suburban: help the parents take their kids to school. Help citizens take their kids to school by improving the transport to these destinations and helping them get back to their homes safely. ? If you want to help the poor, there's a garage (€2 on first level and €1 on higher level), which allows you to repair vehicles under your control. ? OMS also has a generous offer for developers: we ask you to create free mods for the game, and we will give them to you, via Steam Workshop, free of charge. Why get involved in OMS development? OMS is not well known in France, but thanks to the work of the OMS team (around 30 people in total) has been able to reach a level of quality and operation that could be found only in China and the USA. We are now trying to spread the word, expand our Steam community, in order to spread our work globally, for example by organizing events in different countries. If you have any suggestions on how we can improve the game or tools, be our eyes and ears and we'll be happy to answer to you. What is OMS 2? OMS 2 is the evolution of the original Opération mesure de situation. The original OMS is very well known on Steam thanks to its quality in a very low price. The development of OMS 2 takes into account what is expressed by users of the original OMS
