About: If you loved the classic game, Smuggler's 5: Tactics, you're gonna love Smuggler's 5: Turn-Based Elitism, because it's the same core gameplay elements, including a single-player campaign and multiplayer mode. You can play either at your own pace or online in matches against other players. Be it the lands on the east coast, the west coast, or in-game, Smuggler's 5: Tactics has it all. The new version contains new features, such as the large grid map, special effects and weapon damage. The special effects not only add a graphical flair to the battlefields, but they'll also affect the rules, like how the game ends. Even more of the feature includes spectacular events that will change the course of the game. So far, we've seen ships, hugg game-changing ships that can change the course of the battle. These ships are slow, so it will take some strategy to use them to your advantage. Or you can choose your own adventure and play as a pirate, where the only thing you can take from the land you roam is wealth. General Gameplay Information: Storyline : The game tells the story of an expedition set up to find a lost treasure, The Death Star of the Galactic Empires. However, it soon becomes apparent that search, The Empire, a neutral force and the Galaxy Fleet, the galaxy's most powerful and prestigious navy. Use Nearest Teleporter From Fushimi Inari Shrine to Find Free Passage To Googenin in VR Rainer Hellinga Fushimi Inari Shrine is located in the town of Fushimi in Kyoto, central Japan. The temple is the site of the most famous Shinto Shrine in the country. From the train station, there are two ways into Fushimi Inari shrine: "Tegotakenin", a cable car, and "Gin jou wo hensu" (path to go genin), which is the way towards the temple. The path runs in the red circle on the right. Explore the Fushimi Inari Shrine To begin a journey to Fushimi Inari shrine, we have done a special lecture "Discover Fushimi Inari Shrine". This allows us to recommend a way to enter the temple. There is also a map with an outline of the path. If you want to try the VR adventure game "Explore Fushimi Inari VR Compatibility DLC", we can recommend you the "Gin jou wo hensu" (path to go genin) way. Fushimi Inari Shrine is an important Shrine that is located on the way to go genin. Its name means "the Illuminated-count-rice-holy-ground". In addition, it is famous because of the festival of "Inari". The surrounding area is still active with culture and lively festivals. For example, it comes to the center of cultural and cultural events such as Classical Rock Festival. HISTORY The Fushimi Inari Shrine is an "Inari" shrine is located in Fushimi ward in Kyoto Prefecture. The shrine is also known as "Yashiro Inari". The Eigan no Inari is a huge carved shrine which is displayed at the entrance of the temple. It is one of the most famous religious monuments of Kyoto. The legend of the Eugan is about a holy rice that was miraculously appeased by the goddess Inari. Therefore, a huge statue of the goddess Inari was made. Under the leadership of the Fujiwara Kensujirou,

A Comparison of the Efficacy of Image-Guided Cisplatin and Radiotherapy versus Choline Citrate Ringer Solution for Pain Control in Dogs with Soft-Tissue and Bone Metastasis from Canine High-Grade Mast Cell Tumors and Dermatofibrosarcomas. OBJECTIVE To determine whether the use of choline citrate solution (CC) is associated with improved pain control for 24 hours in dogs with soft-tissue and bone metastasis from mast cell tumors (MCTs) or dermatofibrosarcomas (DFSPs) as compared with cisplatin (DDP). DESIGN Prospective, randomized, blinded clinical trial. ANIMALS 16 client-owned dogs with intracranial MCTs and 20 client-owned dogs with intracranial and pelvic bone DFSPs. PROCEDURES Dogs received endoscopic placement of a systemic chemotherapy catheter (30 gauge) that was inserted into the extradural cistern and advanced through the dog's brain toward the target lesions. Dogs also received a single-shot or CT- or fluoroscopic-guided delivery of 2.2- to 5.0-mEq/kg cisplatin into and around the target lesion via a 22-gauge needle. Dogs were randomly assigned to 2 groups: CC (4-8 ml/kg diluted in 1 l of 5% dextrose in 0.9% NaCl; n = 8) or DDP (0.45-0.6 mg/kg of cisplatin diluted in 0.9% NaCl, not in 5% dextrose; n = 8). Dogs were assessed and treated by an investigator blinded to the treatment assignment at baseline and at 2-hour intervals during a 24-hour period for pain levels and sedation scores. Dogs were also examined at follow-up visits. RESULTS The number of dogs that were euthanized and number of cats that died for nonsurvival-related events were
