Even before the race to make the best MMO began, WoW was already in the lead as one of the best examples of an online roleplaying game. Now that the genre is exploding, WoW is showing the way, not just with amazing art direction and player interaction, but also with insane improvements in AI. WoW is still based on a camera view of the world where your entire character and all of his friends are part of the same play field, though it's only recently that this has been extended so much as to support massive content scaling. In the example history below, I've taken a player with a 600k starting wealth, now known as Wodyr, and checked out his character's progression from level 55 to 70 with him on both. Published on Feb 20, 2018 The release date for 'Crazy Rich Asians' has been pushed from Aug. 15 to Aug. 25. Filmmaker Jon M. Chu was excited about his first feature film, due out Aug. 15, 2018, but not quite as excited as the American romantic comedy and the hundreds of people who will be employed to make it. Based on a best-selling novel by Singapore-born, New York Times best-selling author, Margaret Youd. Crazy Rich Asians is the story of a Chinese-American professor (played by Constance Wu) who travels to Singapore to meet her boyfriend's family for the first time in their relationship. "What I really wanted to do is make a story that would affect people, make them feel something, make them laugh, make them cry, get inside their heads," said Chu on the red carpet at the premiere of Crazy Rich Asians in Hollywood on Feb. 8, where he also announced the release date of his next film, Gook. Asked by The Hollywood Reporter about the decision to switch the release date, Chu said, "It feels good that people could connect the two projects in their mind. I'm so excited to release the movie in August, and August is a good month for anyone — your parents and grandparents get to have some fun with you at the beach. It's pretty much the best month to go to the beach. Crazy Rich Asians is a fun summer movie, I think. It's like a summer classic." Chu also spoke about the challenges of filmmaking, which he took on for the first time — not having a studio behind him. "It was a little bit of a leap of faith," he said. "I have no studio. I had no guarantee to play the game. To be able to go in the water and just make a movie, I thought, 'This is my day. I
