It's often tempting to open files in the editor version of Photoshop and save them without being certain of the changes that are being made. Taking this approach can lead to lost work and ruined files. To perform Save As, press Ctrl+S (Windows) or Command+S (Mac). For the last digit, you can choose whether to overwrite the existing file or ask before overwriting. And you can even edit videos with Photoshop! See Book VII Chapter 9 for details. You can use Photoshop for image-retouching or cropping or for converting images to different file types. Unless you're familiar with Photoshop's terminology, you can end up in a lot of trouble when trying to retouch an image without understanding how Photoshop looks at an image. When to use Adobe Photoshop Adobe Photoshop has become the editor of choice for most photographers. It's the image editor of choice for several reasons: Photoshop is a big, powerful program. The interface is a little more intuitive for the general user. There are a lot of tutorials for beginners. Photoshop is

one of the most stable software packages available. Since the less-expensive and more compact Photoshop Elements was created to be a simple image editor, and has become hugely popular with beginners, many photographers and those working with images are looking for a solution. When to use Elements If you want to quickly crop and retouch images using Elements, you can spend your time doing just that — not doing it in Photoshop. Elements is made for the purpose of retouching or editing simple images. It's a powerful tool — just not as powerful as Photoshop. Even though Elements offers less in terms of capabilities, it's a perfect tool for beginners. Elements doesn't have layers and masks, so retouching is more limited than you might expect. Part of the reason that Elements is so popular is that it's simple, but for some users (especially advanced users), it's also slightly misleading. It offers some rudimentary editing tools that aren't always obvious. Photoshop is an ideal application for many photographers who spend their time editing the photographs and files they take. For advanced image editing, Photoshop is the tool of choice. When to use Photoshop Elements If you want the full range of image editing features that Photoshop offers, use Photoshop. Elements is marketed as an all-purpose image editor. For some

The first and second lines of defence in the battle against crime Police has admitted to a “culture change” within the force in Northern Ireland as they face calls for more resources to tackle a rise in violent crime. The Chief Constable of the Police Service of Northern Ireland, Dee Stitt, said the PSNI has introduced changes to tackle zero tolerance and a move to being less reactive and more proactive, stressing that “it’s on us to ensure we’ve changed the culture within the PSNI as we move forward.” However, these measures are under pressure after a dramatic increase in reported crimes within the space of a few months. A total of 117 homicides were reported last year, compared to just 57 in 2011. Stitt admitted that children’s services are under particular pressure. In response, the Irish Government is in the process of appointing a Commissioner for the PSNI to ensure public confidence in the force after allegations of institutionalised police corruption were made by Lord Justice McKittrick and Mrs Justice O’Hara of the Northern Ireland Court of Appeal. welcomed a new EU Consultant in place following three years of British government and the European Commission failing to make an adequate case to the European Parliament to warrant an upgrade in status. Dr Marina Hollingsworth-Hunt is a Senior Visiting Lecturer at the University of Winchester, and has strong connections with the Faculty of Law at Queen's University Belfast. She will focus on EU law, international financial law and EU trade policy. A stint with the European Bank for Reconstruction and Development and the World Trade Organisation have positioned her well to assist the Crofton House team. Last year she was a Visiting Fellow at the Institute of Advanced Legal Studies, University of London, which has now set up a Distinguished Visiting Scholar programme that she has successfully secured. "I am delighted to be joining Crofton House and look forward to working with a team of committed lawyers and policy experts," she commented. "My initial role will be to advise Crofton House on trade and commercial law issues. As the UK prepares to renegotiate its relationship with the EU, and the Republic of Ireland continues to hold negotiations with the EU over its own Free Trade Agreement, Crofton House's unique position within the UK Government's European Policy team means it
