"I love the story, especially as it pertains to the relationship of Athos and Adrest. The combination of sounds effects on top of the beautiful hand drawn animation is the best I've ever seen from a 2D Japanese game. The music is also amazing, the battles are exciting and the gameplay is beautiful." 9.5/10 - "I also can't say enough how impressive the sound is. It's perfectly pitched and the soundtrack is of the utmost quality." 9/10 - "The old-school JRPG formula [is] clearly being updated and polished to meet the current fantasy RPG era. The game's graphics are beautiful, the characters are well-designed, and the battles are exciting. The RPG elements are solid and the game mechanics are intuitive. Elden Ring is a streamlined, traditional JRPG experience that will play very well to newcomers and long-time JRPG fans alike." 8.5/10 - "Elden Ring is easily my favorite game of the year thus far. This is because unlike most other RPGs, this game incorporates an old school feel into modern fantasy tropes. The art style is vibrant and gorgeous, and the combat is fast paced and engaging. Combat is not a button mashing affair, and there are enough options and depth to ensure that you'll not feel like a beginner. With the exception of the lack of health bars, the combat feels almost equal to the other current hit action RPGs. Because of this, Elden Ring can be hard to master if you don't know what you are doing. Another big improvement is the story. The main character (Athos) will grow and learn as the story progresses. However, there's no forced progression from the start of the game. You're able to fully personalize your experience by making choices throughout the entire story. The choices in the game affect how Athos reacts to things. As he starts the game, he is not well rounded or thought out. His actions, and the reasons behind them,
