I have a couple powers, but I'm not sure which one to use. I need to boost a monster's attack to around 12,000+ and the opponent wants it to drop to 4000-8000 and then I'll kill it. A: There is no exact answer as to what works but I think the simplest method is to use a power that gives you a non-combat based buff. Bolster increases your power e79caf774b

I've got a 14 x 96 matrix named 'hires' and I'd like to extract the matrix values into a data frame. I've tried all combinations of unlist/fread, dcast, melt, and paste0, but none of them have worked. My goal is to pass this data to a function that expects a data frame, and so I have to convert it somehow. A:
