mugen has a huge character roster, ranging from playable characters to computer-controlled avatars. if you want to play your favorite characters, or your creation of characters, look no further. a quick list of characters available for download can be found on mugen.org. frozen was inspired by, and in fact, takes place during a battle between the ice villians and the three heroes of the ice kingdom. featured characters include: ice king, ice queen, ice prince, ice guardian, ice warrior, ice demon, ice ranger, and of course, the ice villians. frozen was the first mugen game released on steam and is the centerpiece of mugen. as requested on discussion on the forums, here are the characters i will not use for my current version of mugen. i tried to keep them all unique but unfortunately, a few of them look very similar. for example, the black axe and the demon axe. i also tried to avoid the same-looking characters like bison and rockman.. there's not much that can be done when dealing with limited resources. and while i

won't use the characters, i won't remove them either. so i left them here. characters that are not really aggressive, or do not really move around much, are often easier to control. these characters include, but are not limited to.. villains, supports, and miscellaneous special characters. don't forget to check out the custom character selection screens in mugen.. you can see the full list of custom character screens by heading to the mugen help section of the website. there are also lots of custom character collections, too, that you can find by heading to the community pages. these screens and collections may not be a complete representation of the current mugen roster, but they can be great for inspiration if you're stuck. 5ec8ef588b
