a parte do componente inicial do plugin, o plugin de realizaion de unha conexio realmente simultanea entre o revit e lumion incluía algunhas novas funciones como a condicionaxe de unha conexio realmente simultania sobre un projeto. despois de unha actualizacin do plugin, esta funcionalidade foi retornado e gora deixada como una nova funcionalidade do plugin, que pode facer que os desenvolvedores automatizen unha conexio simultania para do projecto. esta funcionalidade ainda nao esta totalmente automatizada, algunhas funcionalidades devem ser cambiadas para que os desenvolvedores poderian usala, pero os mesmos son implementados porgase aos desenvolvedores. a parte do componente inicial do plugin, o plugin de realizaion de unha conexio realmente simultanea entre o revit e lumion incluía algunhas novas funciones como a condicionaxe de unha conexio realmente simultania sobre un projeto. despois de unha actualizacin do plugin, esta funcionalidade foi retornado e gora deixada como una nova funcionalidade do plugin, que pode facer que os desenvolvedores automatizen unha conexio simultania para do projecto. i am not sure what version of revit you are using. if you are using revit 2013, the livesync works fine. you can try exporting the model to lightware and see if it works for you. if it doesn't work for you then you can try exporting the model to lightware using revit 2014. if that works then you know you have a problem with revit 2013. then, you can use our lumion plugin to modify the revit model and render it again. for more details about the plugin, see our plugin page. our plugin is free and available for download on the lumion plugin page, or at lumion.com/lumionlivesync.html. to download the plugin and start using it with lumion, youll need a revit 2013 or 2013.5 license. you can use this free plugin on one computer, but you can only use it simultaneously on one computer.

i noticed in the vernon navier newton area in revit you can see weldmesh dimensions but you cant see any models to associate these measurements, you can copy the weldmesh dimensions in the ribbon but when you double click the dimensions for example they say it doesnt exist, does not work, this is a big issue for me as the weldmesh plans are an essential step for making a bim project. revit is my favorite cad software. i have to work on it for long hours and i like to make a living from it. i was surprised that on the first page of the app store, i could only download lumion from revit. i was wondering if there is any other way to download lumion so that i can use lumion with my revit project without converting to another cad package. is there any way to run lumion with revit without loosing any feature? the 'developers' group on my revit app store does not work for me as i can not log in. however, i have 'developer' status on the app store. i do not know how to get the 'developers' status. i am also using a web browser to access the app store and i don't know how to go to the group pages like there is a navigation bar from where i can directly access any groups. any help is appreciated. available in two editions, navigate 3d pro and navigate core pro, navigate structure 2013 comes standard with a robust suite of tools for structural 3d modelers working with all autodesk navigate products. navigate brings clarity to the design process. navigate accelerates the design, manufacture and construction of projects by providing a unified cross-disciplinary management system to design, build, and deliver projects. easily design 2d and 3d projects that meet industry standards for building, electrical, mechanical, architectural and infrastructure design. create rich metadata to manage all information related to projects. 5ec8ef588b
