The digital lock service provided by KMA is a great tool to protect your business's digital assets and an essential component of modern business management. Enforce strong and trustworthy digital authentication on your websites, corporate intranet, extranet, online stores and back-up solutions. In addition, the web service allows you to share information among your internal systems and provide your users access to information when they need it. Thank you for your feedback. Your feedback is important to us! SAMPLE USAGE: Turn On The Business Lock: Log in to the KMA Control Panel to access the business lock service On the Business Locks panel, click on the arrow next to the business lock name to access the business lock settings. Click on Enable to turn on the business lock. You will now need to reset your pass phrase to access the business lock. Once you enter your new pass phrase, you will need to wait for 2-5 minutes for KMA to allow the business lock to take effect. After the lock has been enabled, users with appropriate access rights will no longer be able to login to the system. To turn the business lock off, follow the same instructions as above, but instead click on Disable. In the future, you can only access your locked account using your new pass phrase. Website Security: Login to the KMA Control Panel Under Web Services, click on Domain Lock In the Domain Lock Settings panel, check the box to lock the website (and any subdomains) for one hour. Enter a new pass phrase, then click on Save Settings. To view your Domain Lock Settings, login to your KMA Control Panel, and click on the Domain Lock Settings link. You can always view your Domain Lock Settings and change your Domain Lock settings by clicking on the icon next to Domain Lock Settings in your Control Panel. User Security: Login to the KMA Control Panel In the User Management panel, click on User Security You can add additional Active Directory users to this role to restrict which pages or services users can access. Click on the plus icon to add a new Active Directory user, or click on the existing name to edit the user. KMA's staff will review your request and respond within one business day. We provide e-mail notification of review requests. You will receive an e-mail whenever we make a 2edc1e01e8

#### What's New in the Output Time?

Maintaining a business is always helped by a proper resource management regarding projects, tasks, employees, clients and the company itself. Output Time was developed to offer people an accessible, Web-based application that provides an increased project and task management. Packed with features for editing clients, invoices and expenses, it promises to offer a complete business solution. Web-based interface that offers an accessible tab array with all of the necessary features The application presents users with a clean interface that offers a highly customizable set of features. One will be able to easily define an administrator account, personalize it with an appropriate image, credentials and hourly rate if applicable. New company profiles can be set up in no time and people can define users, employees and projects, all with corresponding rates, tasks, projects and roles. Being Web-based means that Output Time will not eat up too many resources. Set up a project management scheme and assign the required resources, with this business management tool Users will be able to define new projects, assign new tasks to them and apply preferred payment rates. Each item can be customized into detail and one will be able to preview a useful graphical statistic for the registered hours, expenses and corresponding employees. Timesheets are also provided, enabling people to define custom payment strategies for each employee and each project's expenses can be standardized using predefined profiles, such as accommodation. Various detailed reports can be generated, displaying the invoice count, amount, payments and much more. Valuable software solution for those who wish to attain a better project and task management within their businesses This application addresses people for who project and task management are important and wish to improve them. It offers a Web-based interface that offers an enhanced maintenance for projects, tasks, users, clients, invoices, payments and bills. Featuring an accessible package and an intuitive handling, it might just be what business owners are looking for.
