Platforms at your disposal, add multiple accounts and arrange columns This utility comes packed with several social network platforms that you can log in, so as to access them at all times. You can use Facebook, Twitter, LinkedIn, MySpace, Flickr, YouTube, Foursquare, Yammer and FriendFeed, yet a small setback is that you cannot add other kind of platforms. Aside from that, you should know it is possible to add multiple accounts to any service, as well as remove one with just a click of the button. You can arrange all the platforms you need in columns, as well as use and integrated web browser to view details or open links. Enable and choose sounds, use HTTPS and customize pop up alerts From the settings panel, you can easily tweak all the options that interest you. To be more precise, you can enable all sounds, show counters for all updates, change the language, automatically change your status to away after a user-input number of minutes, and use HTTPS on Twitter and Facebook for a plus of security. Pop up alerts can be enabled, default sounds can be chosen from a drop-down menu, the avatar size can be adjusted, while you can also display offline contacts, create groups and tinker with other parameters related to the social platforms you are using. A final assessment The system's performance is not going to be hindered at all as it does not require a large amount of CPU and memory in order to work properly. The interface is simple-to-handle and customizable, the response time is good and there are sufficient settings to keep you busy for quite a while. All things considered, it is safe to say that Portable Yoono Desktop is a pretty efficient piece of software when it comes to accessing all your network social platforms in one place, as well as browse the Internet. However, we would
